

Boorowa Playground Soft Fall and Upgrades

Proposed SCF allocation: \$250,000

Background

The Boorowa community is currently serviced by one consolidated playground. The playground is extremely popular with locals and visitors. Much of the existing play equipment has been in place for several decades and is in need of replacement/upgrade.

In addition the existing gravel soft fall is maintenance intensive, restricts access and limits the types of activities that can be undertaken in the playground.

Scope

The scope of the project is to replace/upgrade some of the play equipment and to install soft fall to bring the playground up to standard, improve the general amenity and make the park more accessible.

Project Snapshot
