

## Boorowa Urban Growth Project

Proposed SCF allocation: \$1,000,000

### Background

The former Boorowa Council had been exploring ways to facilitate urban growth within the community. One solution identified was to review what land stock Council had available and consider opportunities to better utilise Council owned land and any potential urban growth related opportunities.

### Scope

The scope of the proposed project is to relocate the existing Boorowa Works depot out of the centre of town adjacent to the main recreation park and relocate it to the Industrial Area where Council does currently own appropriate industrial land to the north east of the town.

Once the depot is relocated, the current site would be redeveloped into an attractive urban precinct that should be a long term cost neutral or positive development.

Should this project progress further, design development and further consultation with the community would be undertaken.
