

Harden Sports Fields & Facilities

Proposed SCF allocation: \$1,000,000

Background

Prior to the creation of Hilltops Council the former Harden Council had commenced a sporting facility rationalisation study aimed at identifying opportunities for potential consolidation and improvement of sporting facilities in Harden.

In addition to the work that had commenced on the sporting fields rationalisation study The Trust overseeing Roberts Park had commenced informing the former Harden Shire Council on their future Roberts Park Community Sports Precinct Revitalisation project.

Scope

The scope of the proposed project will initially require finalisation of the sporting facility rationalisation study and review of existing plans that have been undertaken for sporting facilities in Harden. A detailed scope of works will then be developed based on priorities identified in partnership with the community.
