

Murrumboola Creek Beautification & Connectivity

Proposed SCF allocation: \$1,100,000

Background

Murrumboola Creek is one of the focal natural features in Harden/Murrumburrah. The former Harden Council had gradually made improvements along the creek and improved the amenity of the area.

Scope

The scope of the proposed project is to further develop linkages along and into the creek precinct and construct features that will encourage further utilisation of the area. This project would link to proposed improvements at Roberts Park, Coddington Park and the Light Horse Memorial.

Should this project progress further, design development and further consultation with the community would be undertaken to develop a final plan for implementation.
