

Young Swimming Pool Turnstiles and Entrance

Proposed SCF allocation: \$2,000,000

Background

The former Young Council has invested in recent years in significant improvements to facilities at the Young Swimming Pool. The Council had been considering further staged improvements at the pool with detailed scoping yet to be finalised prior to the creation of Hilltops.

Scope

The scope of the proposed project is to improve the amenity of the Young Swimming Pool. Prior to expending any funds on this project Council will undertake detailed planning and feasibility to determine the exact scope of works and long term future of service levels provided at the Young Swimming Pool. This will include a detailed assessment of the feasibility of a heated pool in Young which had been identified for consideration by the former Young Council and the community. A decision on the feasibility of heating the pool will impact the final detailed scope of this project.
